AIDS is a fatal virus which attacks the immune system of the body. It is spread through blood, semen, and vaginal fluids. It is not spread through air, water, or food. The virus attacks the CD4 cells in the immune system, which are responsible for fighting off infections. As the number of CD4 cells decreases, the body becomes more susceptible to various infections and diseases. AIDS is a chronic condition that can lead to death if left untreated. It is important to get tested for AIDS regularly and to practice safe sex to prevent infection.

Program Report

Program Name: An Awareness Program on cashless Transactions

Basically, India being an agriculture and rural dominated nation many of the dwellers rely on by-hand cash in terms of money transactions. As of late, due to sudden demonetisation these are affected due to lack of knowledge on digital transactions. Few of our trained volunteers and students under the VISAKA training program along with few faculty and SBI Ananthagiri officials initiated an awareness program for the people of Ananthagiri, Ameenabad, Golthanda, Kanapuram, Bojjagudem thanda and Venkatrampuram in which they moved throughout the villages and incorporated knowledge on various aspects like swiping of cards, change of pin and password. Also, personal attempts on these activities were shown in practical to ensure the aptness. Despite the first venture, consequential benefits were apparent.
